Fishing

Connor, our fishing correspondent has this to
news
say

Tuna is one of the biggest fish you can catch. Some people have caught Tuna off the coast of Cornwall. The most expensive tuna is a bluefin tuna, the highest price paid for a bluefin tuna is \$3.2 million dollars.

Jelly cats are highly collectable soft toys. This is Fred, you might have seen him around school

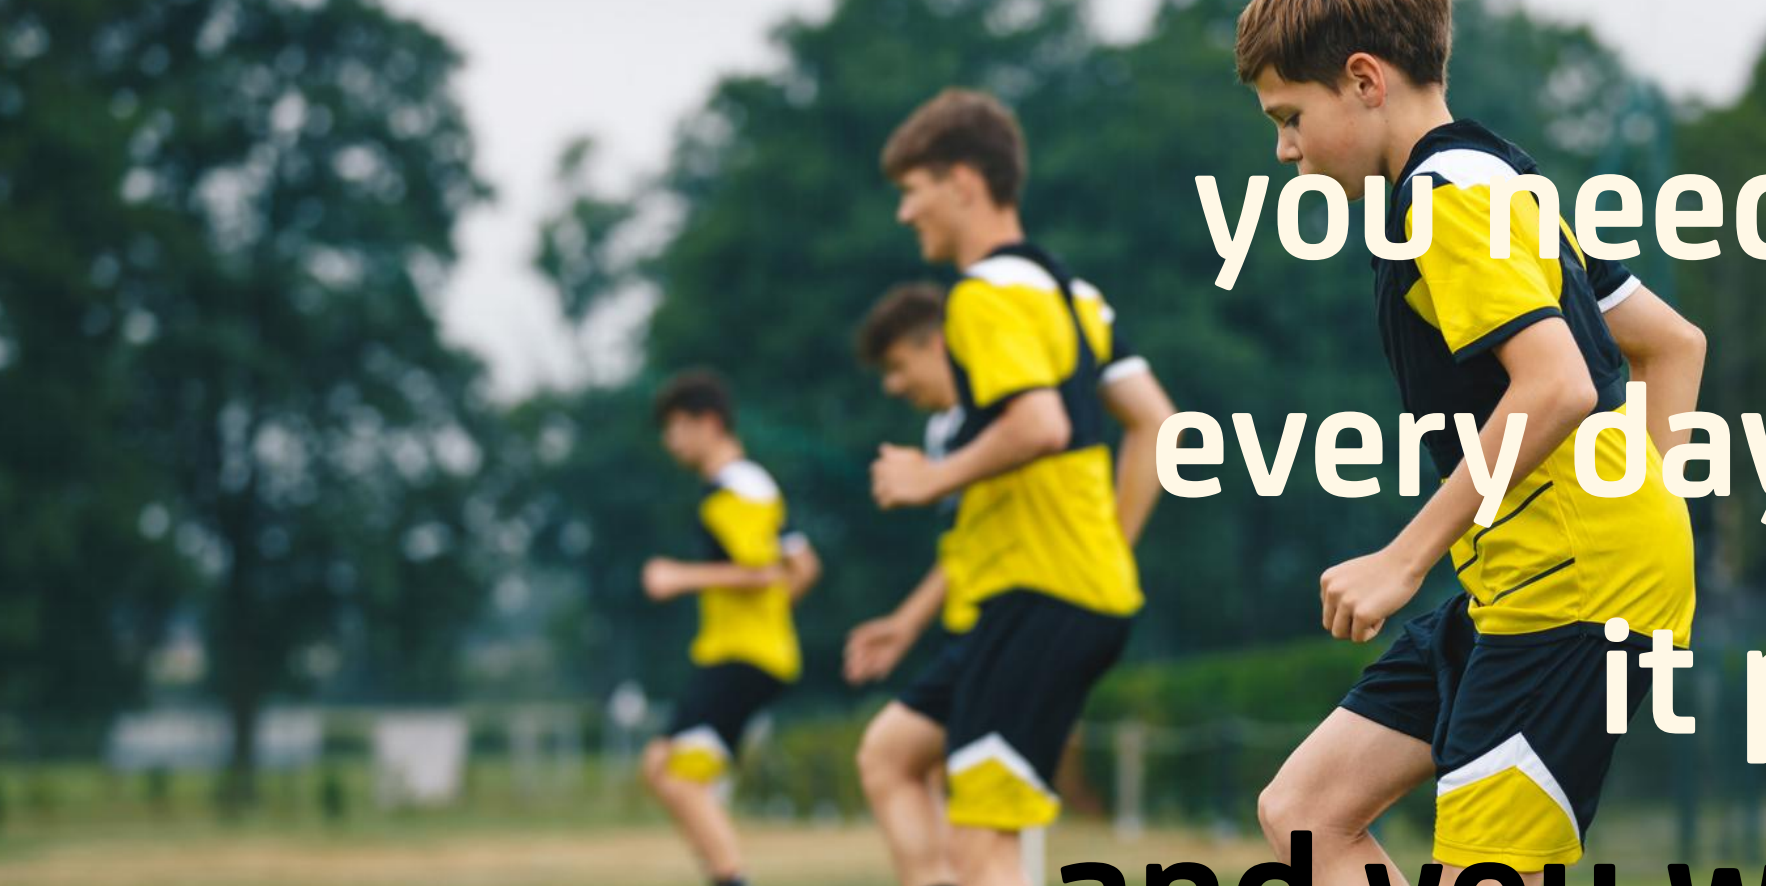

The most collectible Jellycats are often limited-edition or discontinued versions of popular lines like the Bashful Bunny and Fuddlewuddle ranges

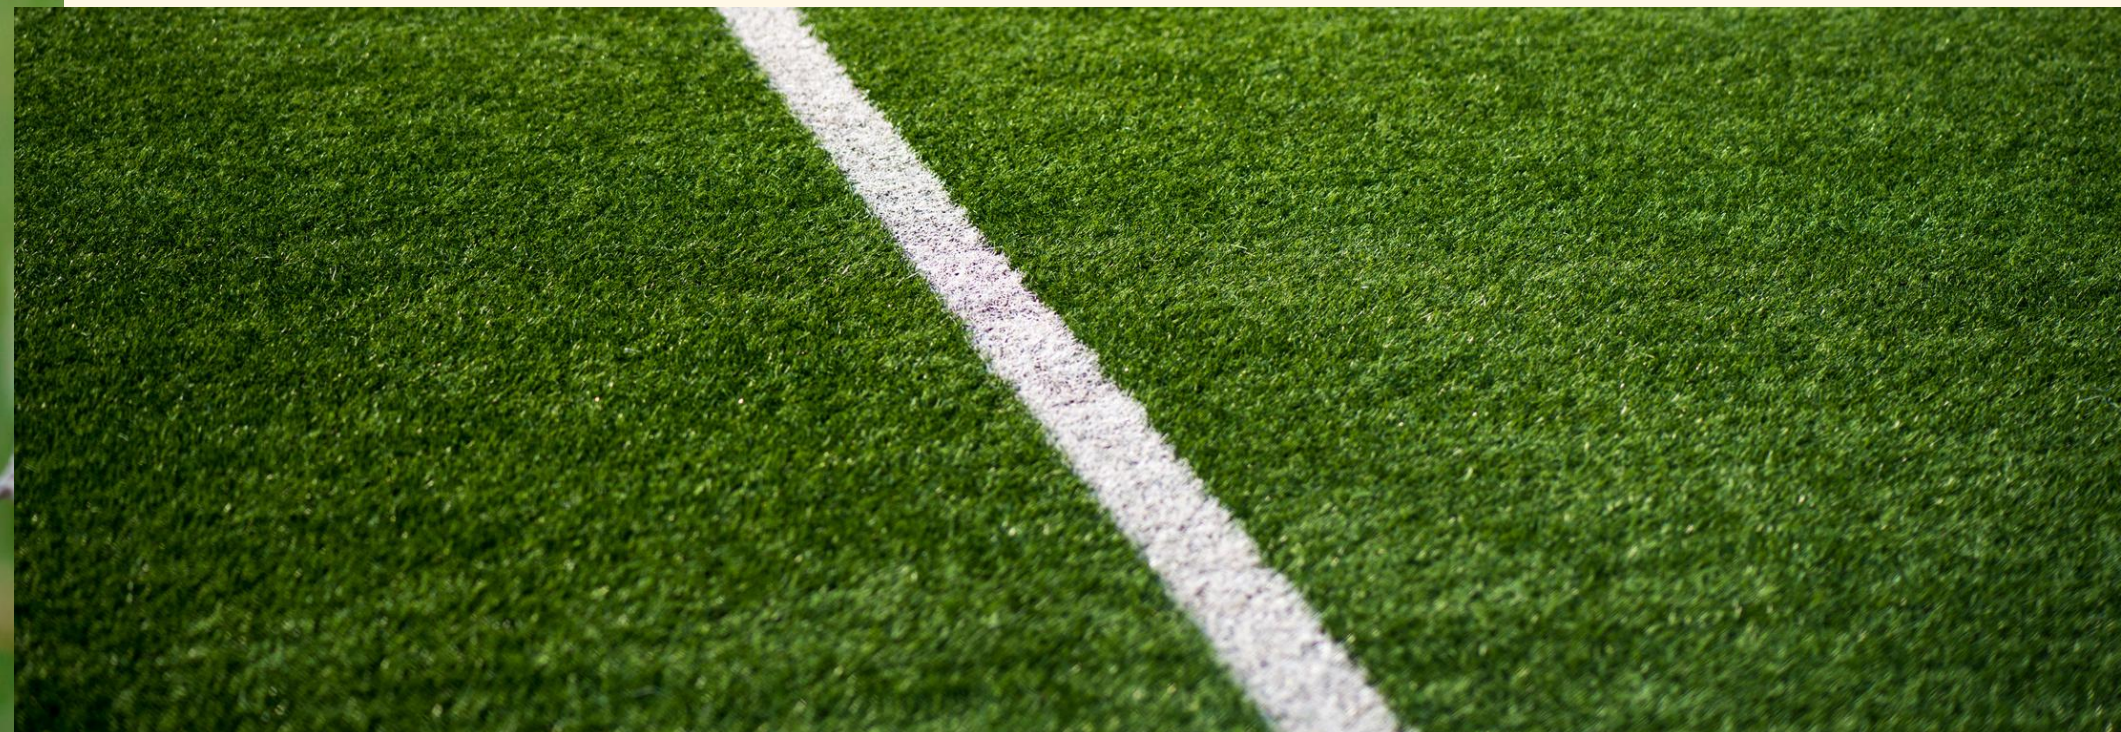

An aerial photograph of a green football pitch. The pitch is marked with white lines, including a central vertical line and a large circle in the center. Several players are visible on the field, appearing as small figures. The text "how do you get better at football?" is overlaid in a large, white, sans-serif font, centered horizontally and partially overlapping the central circle.

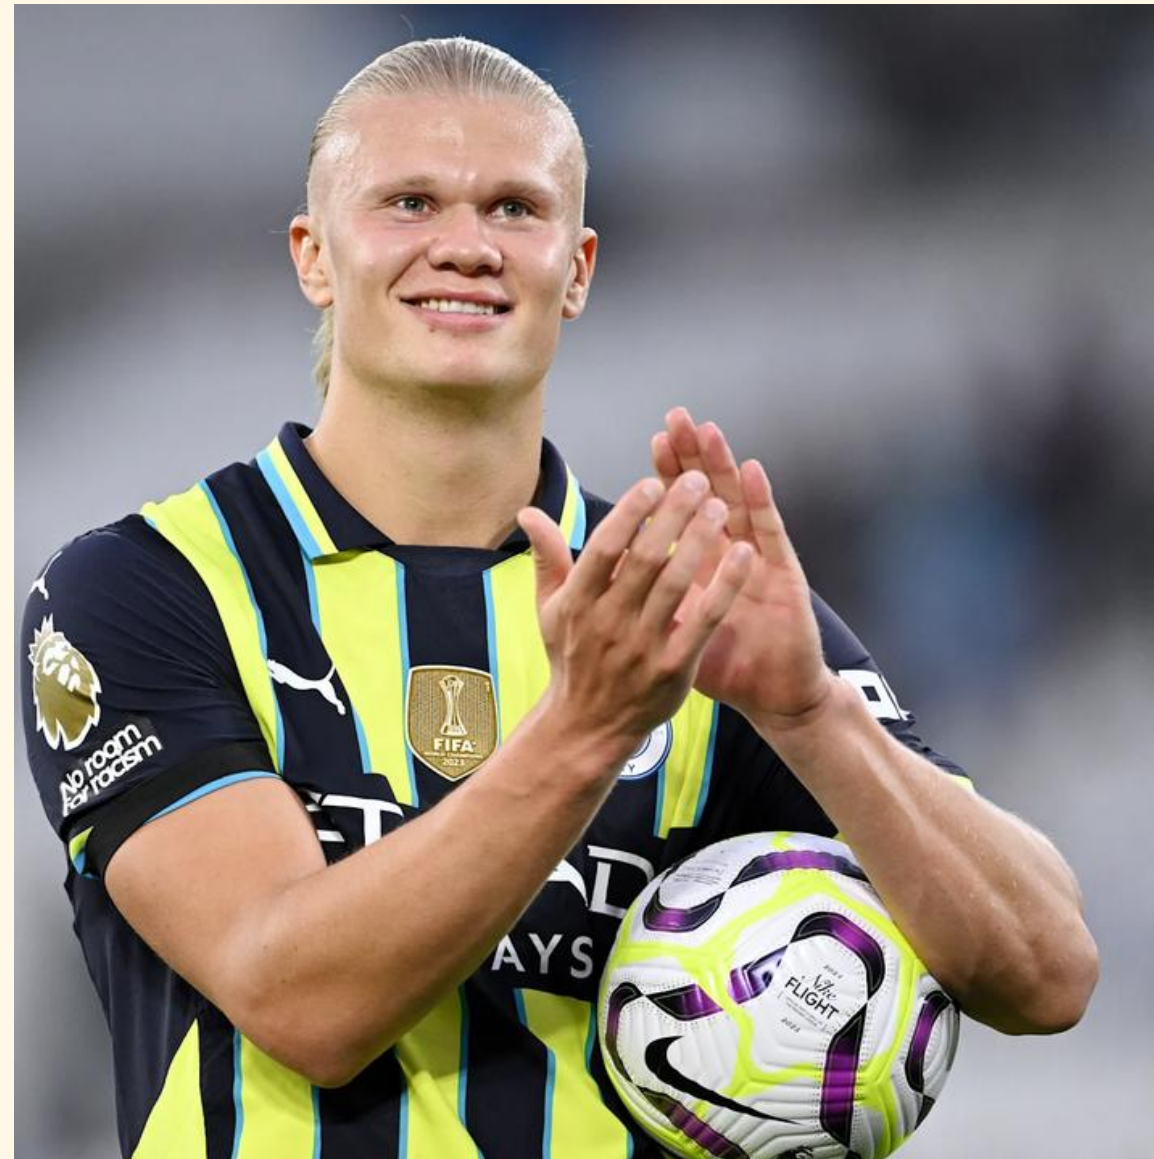

how do you get better at
football?

you need to train
every day to make
it pro
and you will get better

You can watch the pros and see what makes them so good. Some may have lightning speed, some have clinical finishing and some have magical dribbling. Try and take things from other player's game and add it to your own.

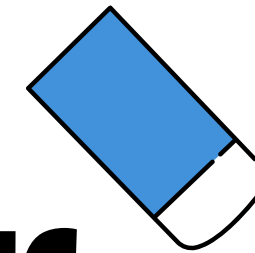

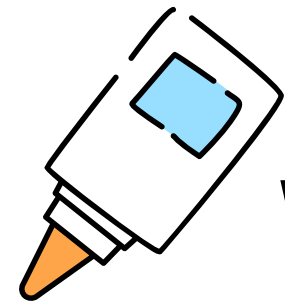

The Grinch is a grumpy, green, furry creature from Dr. Seuss's book *How the Grinch Stole Christmas!* who lives in a cave overlooking the town of Whoville. He despises Christmas and the joy of the Whos, so he attempts to stop Christmas by stealing all the presents and decorations. Ultimately, his heart grows three sizes after he realizes that Christmas means more than just presents, and he returns everything he stole.

Movie Review

cool film and its good when he is bad at first but turns good and when he goes in the village and steals all the presents is really funny
